

Leave the NJ Do Not Call Law the way it is! If the FCC weakens it in any way, things will slowly return to the way they were. Makes me wonder if the FCC is in bed with the telemarketers?!?! Also, the FCC should really look at what they find to be acceptable on public radio/TV. Anything regarding sex seems to be taboo-but what about violence, language and the related subject material? If you censor one then all must be censored. Here's an idea, let's return to the way things were in the 1970's and 1980's, bring back those standards! At least we still had SOME innocence during those times!
